PROFILE

Frontend Developer with 4+ years of experience building high-traffic web applications in the travel and SaaS domains. Specialized in Vue.js and React/Next.js ecosystems, with a track record of delivering measurable business results — including a 4× conversion rate improvement at Alibaba Travels. Known for clean architecture, reusable component design, and strong cross-functional collaboration in Agile teams.

PROFESSIONAL EXPERIENCE

Alibaba Travels Co

Aug 2023 – Present | Tehran

- **Engineered** and maintained production frontend features using Vue.js, serving thousands of users on a high-traffic travel platform.
- **Architected** and led frontend implementation of complex UI flows and business logic within CMS-driven and data-synchronized environments.
- **Diagnosed** UX and logic bottlenecks by analyzing operational signals (provider supply quality, ERP behaviors), then **shipped** targeted improvements that drove conversion rate from 0.09 to 0.4.
- **Eliminated** invalid selection errors by blocking unavailable date choices and routing users toward purchasable packages, directly reducing ERP exposure.
- **Delivered** reusable, maintainable component systems in close collaboration with Product, Backend, QA, and Data teams in an Agile/Scrum environment.

MaadCo

Jul 2021 – Jun 2023 | Isfahan

- **Architected** a modular, extensible calculator for signal-based industrial monitoring tools using the Factory Design Pattern, improving scalability and long-term maintainability.
- **Overhauled** the main dashboard interface, cutting rendering time by 40% and significantly sharpening usability for daily users.
- **Established** unit test coverage across core frontend logic, ensuring reliability and catching regressions early.
- **Researched and shipped** PWA capabilities and push notifications, boosting user engagement and enabling seamless offline functionality.

PROJECTS

YogaFlow (Yoga Studio Management MVP)

Jun 2026

Next.js 15, TypeScript, Prisma, Tailwind CSS, Docker

- Built a **SaaS-style app** to replace manual tracking with **digital management** for students and classes.
- Developed logic to **automatically calculate** remaining sessions based on **student attendance**.
- Set up a **professional CI/CD pipeline** using **GitHub Actions** to automatically test code before it is published.
- **Containerized** the application using **Docker** for consistent development and easy hosting.
- Leveraged **agentic workflows (Codex)** to accelerate development while maintaining strict architectural standards and comprehensive documentation.

Next.js 15, TypeScript, SSE, Zustand

- Developed a **high-performance dashboard** for gold shops using **Next.js 15** and **TypeScript**.
- Used **SSE (Server-Sent Events)** to display **live price updates** instantly without screen flickering.
- Built a **Multi-tenant system** that automatically updates **branding and logos** based on the specific shop.
- Created a **stable PWA** designed to run **24/7 on large displays**, with **offline resilience** to handle internet drops without crashing.

SKILLS

Languages & Frameworks

TypeScript, JavaScript, React, Next.js 15, Vue.js, Nuxt.js, Tailwind CSS, shadcn/ui, Framer Motion

Backend & Data

Prisma ORM, PostgreSQL, RESTful APIs

Testing & DevOps

Vitest, Jest, Docker, GitHub Actions (CI/CD), Husky, Sentry

Architecture & Practices

Clean Architecture, Feature-based Architecture, Multi-tenant SaaS, PWA, SSE, Agile/Scrum

Tools

Git, pnpm, Dependency-cruiser, Agentic Workflows (Codex)

EDUCATION

Bachelor of Science (B.Sc.) in Computer Engineering

University Of Isfahan

Sep 2018 – Sep 2022
